

I-5 Corridor Reinforcement Project

Guide to finding your property online

November 2012 interactive map

The November 2012 interactive map reflects the design of all four action alternatives as they were studied in the draft environmental impact statement and identifies BPA's preferred alternative. Follow the instructions below to find your property or other locations on the interactive map.

Step 1:

From the project website www.bpa.gov/goto/i-5, select "November 2012 interactive map" under "News and Highlights" on the right side of the page. You will leave BPA's website and enter the interactive map site.

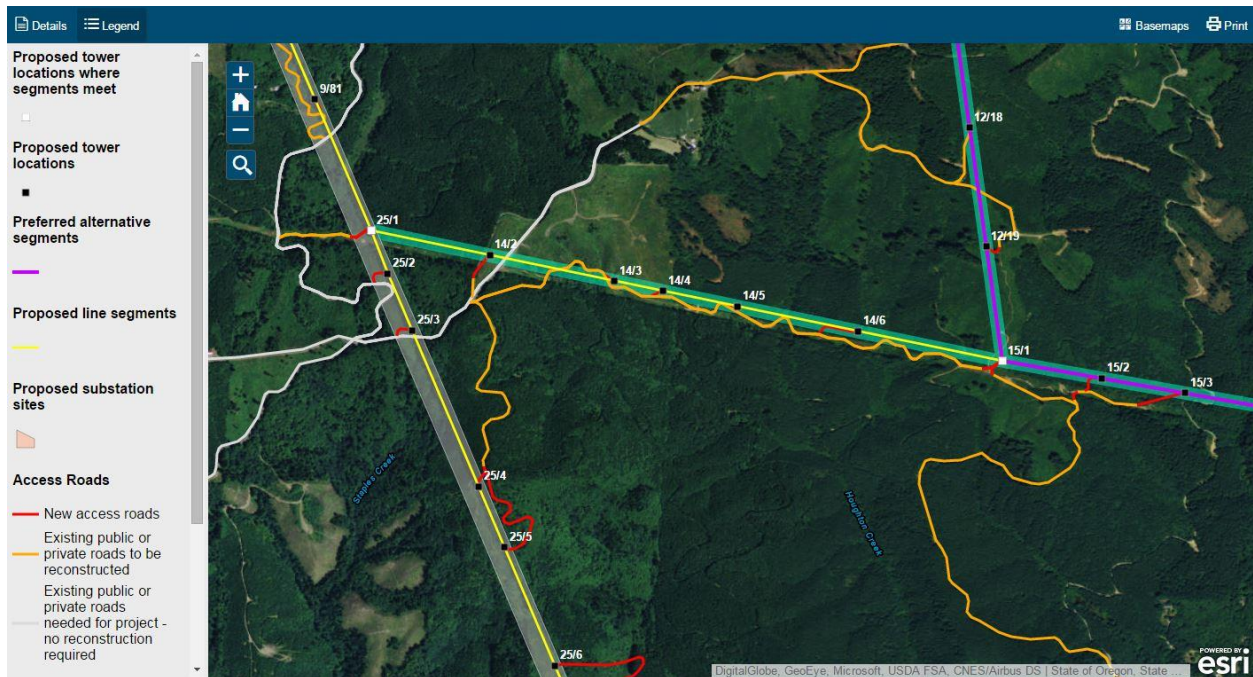

Step 2:

Click on the magnifying glass on the left side of the map to enter your property address or nearest intersection. Press "Enter" on your keyboard to begin the search.

Step 3:

The map will zoom in to the address you provided, allowing you to see if proposed locations of transmission towers and access roads are near the property. Use the tools on the top left corner of the map to zoom in and out of the area displayed, or you can “drag” the map with your mouse to scroll to a different area you would like to view.

February 2016 interactive map with adjustments to preferred alternative

In February 2016, BPA posted an updated version of the interactive map that reflects more recent adjustments to proposed transmission tower and access road locations on BPA's preferred alternative. This map can also be found on the project website. www.bpa.gov/goto/i-5. Click on “February 2016 Interactive Map” under “News and Highlights” on the right side of the page.

June 2014 interactive map archived

The June 2014 interactive map showed previous refinements to the preferred alternative that have since been updated. The June 2014 interactive map has been archived in the Library page of the project website www.bpa.gov/goto/i-5.
